

zend®studio

The leading professional-grade PHP development environment

Features at a Glance

Powerful Code Editor

Easy Code Navigation

Zend Framework Integration

PHP Code Generation

Zend Server Integration

Advanced Debugging

PHPUnit Testing

Database and SQL Tools

Team Collaboration

Support for Agile Development

Technical Support

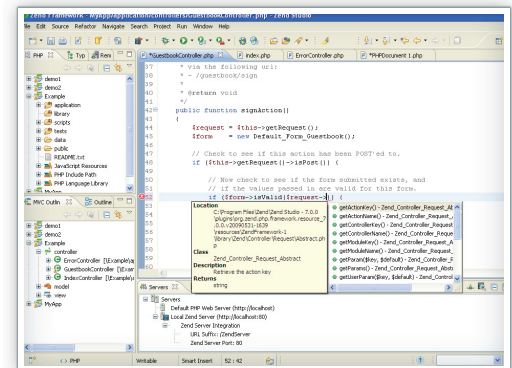

Zend Studio maximizes developer productivity by enabling you to develop and maintain code faster, solve application problems more quickly, and improve team collaboration.

Based on the Eclipse PHP Developers Tools (PDT) project led by Zend, Zend Studio offers all the development capabilities required by professional PHP developers as well as a plethora of plug-ins that enable you to extend and customize your environment.

Develop and Maintain Code Faster

Create high-quality code quickly with a host of powerful features including:

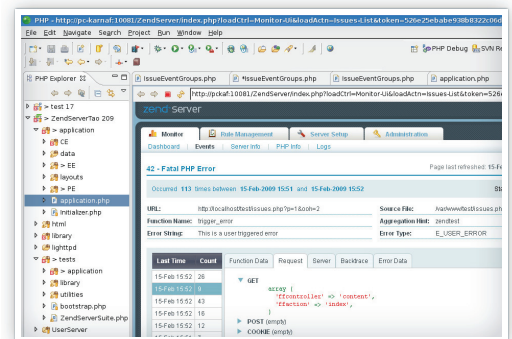

- Syntax highlighting, code folding, code completion, code formatter
- In-place code refactoring, variable/method extraction
- Semantic analysis and quick fix suggestions
- Tight integration with Zend Framework
- Code generation using the Zend Framework Zend_Tool
- Reuse Java code through Zend Server's Java Bridge
- Write and run queries for all popular databases

Find & Solve Problems Quickly

Easily detect and pinpoint problems during development, testing, and after the application is deployed to the production environment:

- View performance and functional issues detected by Zend Server from within the Zend Studio user interface
- Reproduce and debug any problem detected in the test lab or in the production environment using the data captured by Zend Server
- Debug and profile your application locally or on the server
- Leverage advanced debugging features such as conditional breakpoints, stack trace view

The PHP Company

Improve Team Collaboration

Facilitate team collaboration and support Agile development methodologies:

- Use CVS or Subversion for source configuration control directly from within Zend Studio
- Perform Unit Testing using the integrated PHPUnit
- Ensure consistent code documentation with PHPDocumentor
- Use Tasks and To-Do lists to manage open action items
- Accelerate setup for new developers by sharing project settings across the team

Extend and Customize Your Environment

Zend Studio is based on Eclipse PHP Development Tools (PDT), a widely popular open source project led by Zend. This not only ensures a highly reliable and standardized development environment, but also enables you to use more than 1,000 Eclipse plug-ins, such as Mylyn for Application Lifecycle Management, JSON Editor and Adobe Flex Builder. The open Eclipse architecture allows you to extend your environment to suit any of your development or testing needs.

A Complete Development and Runtime Solution

Together with Zend Server and Zend Framework, Zend Studio provides a complete solution for the entire application lifecycle:

- Set up a complete development and runtime environment in minutes with Zend Studio and Zend Server integration
- Jump start your Web application development and boost productivity with Zend Framework integration
- Test and stage your application on Zend Server using a consistent runtime environment at all stages
- Detect and pinpoint root cause of problems in the test lab or in the production environment with Zend Studio and Zend Server integration

Zend Developer Solution

Create better-quality PHP applications faster with Zend Developer Solution, a combination of Zend's leading PHP products and professional consulting:

- **Zend Server** - A complete PHP application stack that also includes performance enhancements, application monitoring, problem diagnostics, technical support and updates
- **Zend Studio** - The leading professional-grade PHP development environment
- **Support & Consulting by Zend's PHP experts**

System Requirements

Supported Operating Systems

- Windows x86 2000, XP, 2003, Vista
- Linux x86
- Linux x86-64
- Mac OSX 10.5 Leopard, OSX 10.4 Tiger, G4 or G5 and Intel processor

PHP Compatibility

- 4.2.x, 4.3.x, 4.4.x, 5.0.x, 5.1.x, 5.2.x, 5.3

Zend Server Support

- Zend Server 4.x

Supported Web Servers

- Apache 1.3.x, 2.0.x Apache 2.2.x
- IIS 5, 6, 7

Supported Browsers

- MS Internet Explorer 5.5 & above
- Firefox 1.5 & above
